

NEW DIAMOND VANTAGE[®] RESIN FICKERTS

FOR GRANITE & CRITICALLY HARD MATERIALS

DIAMOND VANTAGE[®] NEW RESIN FICKERTS FOR GRANITE & CRITICALLY HARD MATERIALS

- Fickert shaped resin and diamond polishing blocks are the final steps in slab processing. These pads are designed for stone quarries to take slabs from a raw ground surface to a super high gloss. They are most commonly used on automated slab polishers and radial arm machines in multiples of four or more.
- The Fickert shaped backing makes it easy to change out the pads as they simply slide in and out of the holder.
- Our pads are available in grits 100 to 3000 and are best on granite and other critically hard materials.
